

QIPS 2025: Adult program

Glycemic Status Assessment for Patients with Diabetes

Stars Measure | Primary Focus | Diabetic Care

Measure Requirements

Commercial members are compliant if the most recent 2025 HbA1c level is less than 8%. The member is not compliant if the most recent lab result is greater than 8% or if there are no lab results during the measurement year (2025).

Medicare Advantage members are compliant if the most recent 2025 HbA1c level is less than 9%. The member is not compliant if the most recent lab result is greater than 9% or if there are no lab results during the measurement year (2025).

Member Requirements

Members who were with a practice for 11 consecutive months within the measurement year (2025) and who were ages 18 through 75 as of December 31 of the measurement year (2025) who were identified as diabetics through pharmacy data and claims/encounter data in the measurement year (2025) or the year prior to the measurement year (2024).

Options to close Care Gaps

- Option 1:** Claim/encounter submission with appropriate coding.
