

# QIPS 2025: Adult program

## Statin Use in Persons with Diabetes

Stars Measure | Tertiary Focus | Statin Therapy

### Measure Requirements

The percent of Medicare Advantage members ages 40 through 75 who were dispensed at least two diabetes medication fills on unique dates of service and received a statin medication fill during the measurement period. The percentage is calculated as the number of member-years of enrolled beneficiaries ages 40 through 75 who received a statin medication fill during the measurement period (numerator) divided by the number of member-years of enrolled beneficiaries ages 40 through 75 with at least two diabetes medication fills on unique dates of service during the measurement period (denominator).

Members are only included in the measure calculation if the first fill of their diabetes medication occurs at least 90 days before the end of the measurement year or end of the enrollment episode.

### Member Requirements

Continuously enrolled **Medicare Advantage** members ages 40 through 75 with at least two diabetes medication fills on unique dates of service during the measurement period.

QPM Targets	
Band 1	95% – 100%
Band 2	91% – 94.99%
Band 3	88% – 90.99%
Band 4	82% – 87.99%
Band 5	<82%

See payment details in section 5 of the QIPS guide.
